FlexITy Solutions Inc. Recognized by Cisco as TelePresence Authorized Technology Provider in Canada

Richmond Hill, Ontario – January 21st, 2010 – FlexITy Solutions Inc. announced today that it has achieved TelePresence Authorized Technology Provider (ATP) status from Cisco. This designation recognizes FlexITy as having fulfilled the training requirements and program prerequisites to sell, deploy and support Cisco TelePresence.

Cisco TelePresence Meeting solution is a revolutionary new category of products that create live, "face-to-face" meeting experiences over an Internet Protocol (IP) network. It combines the reach, intelligence and reliability of the network with the simplicity of a telephone interface to deliver an entirely new way for people to meet and collaborate. Cisco TelePresence Meeting is the first application of Cisco TelePresence technology.

"We're pleased to add another Cisco ATP status to our list of Cisco credentials," said Peter Stavropoulos, CEO of FlexITy Solutions Inc. "Through Cisco TelePresence solutions, FlexITy will bring enhanced communication and collaboration capabilities to our customers. With the ability to connect 'in person' at a moment's notice, customers will be able to realize greater productivity, make better use of resources, and promote a greener organization."

"This certification helps ensure that FlexITy's sales and support are better prepared to properly sell, design, install and support clients with the Cisco portfolio," Peter Stavropoulos said. "This additional recognition adds to FlexITy's already strong capabilities in unified communications, data center and managed services practice."

"Cisco TelePresence changes the entire realm of communications and collaboration," said Richard McLeod, director of unified communications for worldwide channels at Cisco. "As a Cisco TelePresence ATP partner, FlexITy has made an investment in the sales, technical, and lifecycle services capabilities that our customers need to help customers successfully deploy complete solutions."

The Cisco Authorized Technology Provider (ATP) Program is part of Cisco's go-to-market strategy for emerging technologies. The program helps Cisco to define the knowledge, skills and services that channel partners need to successfully sell, deploy and support an emerging technology. As the market changes, an ATP may be discontinued or evolve into a Cisco specialization.

About Cisco TelePresence

The Cisco TelePresence Meeting solution combines the industry's first ultra-high-definition 1080p video with high-quality, wideband spatial audio, imperceptible latency, and comprehensive environmental design. Meeting participants feel as if they are in the same room, even though they may be on separate continents. With the ability to see and hear others in ultra-high-definition video and wideband spatial audio, users truly experience the subtleties and nuances delivered by body language, eye contact and facial gestures that make up more than 60 percent of communications. With Cisco TelePresence, participants focus on the meeting and not the technology.
